Development and Services*

**If we are not the first experience for the customer"
" We will certainly be the last**

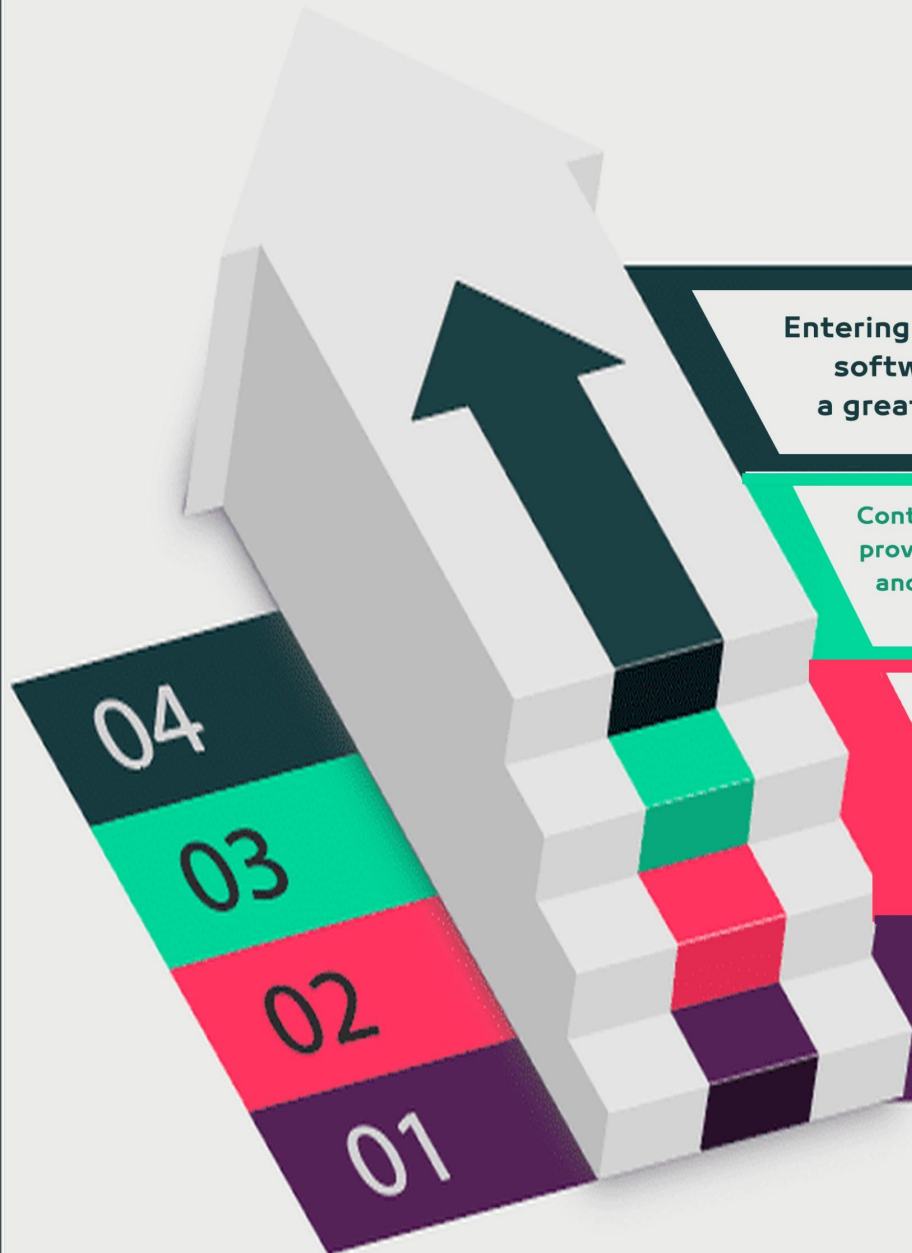

Tasis Meadows

The promoter was established in 1419 A.D. 1998 in the western region of the Kingdom of Saudi Arabia, Jeddah City. It is one of the few establishments that has taken the course of developing integrated information systems that are concerned with the activities of large and medium enterprises because of the convictions of those involved that the systems available in the local and international market in particular do not cover all the real needs of local enterprises.

The contracting method of these systems does not serve customers' interests to the extent that it serves the interests of suppliers and contractors .

Our Goals and Vision

Entering global competition in the supply, development and application software, systems and applications through the development of a greater number of systems and applications in several languages.

Contribute to the development of the skills and expertise of IT professionals by providing opportunities to train national university students and new graduates and prepare them for working life and motivate them to stand out and create a spirit of competition for them.

Endeavor to devote confidence-building to national and Arab establishments specializing in the development of systems that are constantly keeping pace with technical advances in computers, languages of development, programming and databases, as well as to the building of trust in the national and Arab human being with a long history of creativity and his ability to love excellence and pioneer in the fields of multidisciplinary inventions.

Provide software and systems services to all enterprises used for them at different size and activities at affordable and accessible prices.

With the continuous development in the capabilities of computers in terms of doubling the speed of completion of operations and expanding the storage of information and data, which is the result of intense competition between the world's computer manufacturers These companies translate this development and devote it to serving customers and users of computer devices by developing software and systems to suit the capabilities of modern devices and meet users' needs.

Each company can classify an independent group
of activities so that the system provides final financial
reports at each activity level

08

Common technical characteristics of systems

The systems have a monitoring mechanism for each user so that they provide daily reports on the work carried out by that user.

09

Ability to automatically calculate estimated balances
.Providing deportation programs for accounting

12

Provide a monitoring mechanism for each
.information [data field] in each system file

10

Provide the possibility of defining cost centers
Analytical for profit and loss accounts or accounts
.Income statement

13

The system provides a range of
pre-defined files and data.

11

- Job names, occupations, disciplines, nationalities, documents and publications.
- The names of countries, governorates, cities and neighbourhoods.
- All scientific terms related to documentary credits, bank guarantees, terms used in project management, real estate, maintenance and other activities that need to be classified and defined for the terms of their daily procedures.

14

Flexibility and breadth in the classification of the chart of accounts , items, customers, and pricing processes in Selling and cost.

15

Definition of all types of units for items, units of weight, distance, area and size according to the French and English system with definition of conversion transactions between units and between the French and English systems.

01

It is our task not to place responsibility on the client if he stumbles or delays in providing data, indexing it, preparing its opening balances, our commitment to engage and follow up diligently, but assuming responsibility on behalf.

Our Mission and Commitment

Our mission is to develop and compete and our commitment to excellence and excellence.

02

03

Our mission is to protect data with minimal effort on the user
The system is unique in this protection and our commitment to provide oversight on the user to ensure the accuracy of the data.

Our mission is to receive and execute customer requests even after The actual operation phase of the systems and our commitment to propose and improve these requests from our experience.

04

Value

Our confidence in the ability to develop is a basis for credibility and transparency with our customers.

Provide customer with support solutions for systems and assistance In providing the necessary and ideal expertise in operation.

Estimate customer's late orders before and after operation and then research the rights arising therefrom.

6

Providing the ability to extract and convert reports into formats Excel and PDF files.

The number of users is open and unspecified.

Provide the ability to copy key file data from Excel files.

Provide training for users on the company's main site through operating supervisors.

Provide the possibility of self-registration in Arabic and English for all annotations of daily movements regardless of the language used by the user, with confirmation that the system contains screens, displays, search lists and interfaces in Arabic and English.

Explanation of movement or accounting restriction resulting therefrom. This is a feature that speeds up movements, reduces spelling errors in reports to customers, suppliers or official entities and finally consolidates adequate text explanations in their sense and does not leave the user to strive.

Provide the possibility of liberalizing automated accounting entries between branches One company through automated brokering of the accounts of the management and branches of the company, as well as providing the possibility to edit the automated accounting restrictions between the sister companies through automated brokering of the accounts of the corporate neighbors Sister.

Provide the possibility of issuing receivables or exchange bonds to and from the accounts of banks, funds or monetary covenants that belong to all branches and activities with an automatic impact on the public accounting system.

Provide the possibility of printing a unified balance sheet for the company Holding, budget, audit balances and income lists for each One of the company's branches separately.

09

01

02

03

04

05

06

07

08

Provide a mechanism for the distribution of revenue for financial periods, so that the share of revenue is calculated daily and distributed to monthly financial periods.

Distribution of expenses paid automatically in advance and by days over the specified expense period, as well as distribution of income received automatically in advance over the revenue time period Introduction ".

Provide the possibility of addressing prior years' expenditures or prior years' revenues so that they do not affect current year income lists from the sources of system movements during the release of automated accounting limitations for such movements.

Provide high and comprehensive control of user movements within the system and documentation of all entries, modifications and the rest of the movements made by the user from the moment of entry into the system until the moment of exit. The system provides the possibility of recording a file (Log File) for each user.

15

17

16

10

11

12

13

14

The system contains a special list of tabase and software management, So that the tables of the database and the contents of each table of fields are defined the recipes, type and length of each field of letters and the definition of its place in the table, The system also provides the possibility of indexing tables and fields according to its own system, This provides you with easy access to databases and technical specifications.

System properties

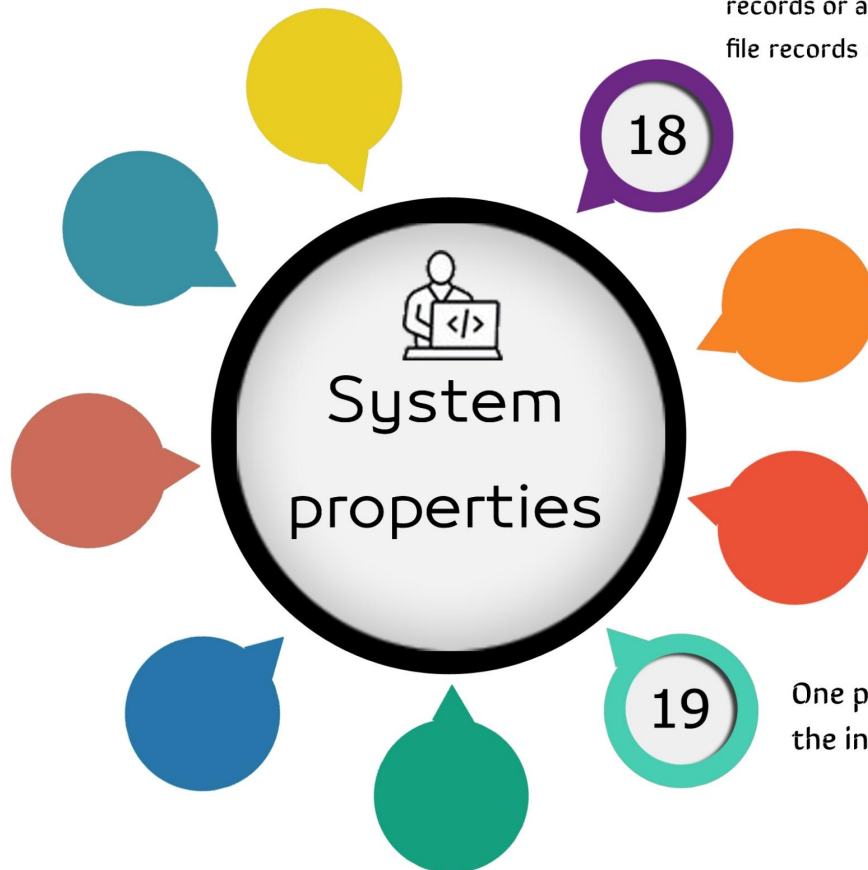

Provide users with the possibility to make special lists for easy user access to function and screens within their powers.

The system and as per customer's requests provide archiving services Electronic files for major files, movements files and financial and administrative procedures whether the source is directly from the scanner or from files stored on the storage media in all kinds of such files.

The system contains a follow-up service for the series of administrative and financial procedures by automatically issuing alerts through emails, mobile messages or on-screen notifications to users Work Flow & Notification System.

The system provides the possibility of preventing the user from carrying out a movement whether it is a movement, a financial procedure, a movement or an administrative procedure, although there is the user's authority to deal with and use such movement and procedure. This prohibition is due to the lack of some data needed for some file records or a lack of integration and interconnection procedures between single system file records or other system file records. This feature reduces users' errors.

Editing internal letters and correspondence between employees benefiting from many classifications associated with employees such as nationality, job title, specialization, sex and the location of the employee's work by allocating management, branch, company, project and other classifications.

One part of the system contains the internal mail system which provides:

The possibility of receiving the user according to his responsibilities and powers for warning, alert or news messages issued by the system databases as a result of achieving a pre-defined requirement from an administrator on the fields and data of the database files. The second type of messages provides integrated management of the system away from the intervention of all users.

Our services backing

Copy and migrate the old data of the customer from Excel files to the central database of the system. This copy is limited to the data of the main files so as to facilitate the task of starting the application for the customer and shorten the time to activate the system for the client.

Establishing a Client Enterprise Account Manual and linking it to systems.

Training users both on their desk and device with the possibility of repeating the training process

Provide a monthly client report with feedback on users' entries, excesses, errors, and therefore evaluate them, and then provide advice and advice to correct and reduce the size of such errors.

Our facility is characterized by a direct contracting policy with its customers based on an unlimited number of users.

Interest in recruiting new graduates from programming and systems science and the importance of establishing them by providing them with training in systems analysis and understanding of financial and accounting systems.

01

Our conviction in the initiative to showcase the best options for customers' requests by not hesitating to give advice and correct these requests in order to contribute to the outstanding success of both parties.

05

A successful item is who looks at his watch for fear of working hours expiring for his day and in order not to postpone his work for the next day and not to wait for daily working hours.

02

A successful item is who looks at his watch for fear of working hours expiring for his day and in order not to postpone his work for the next day and not to wait for daily working hours.

06

Our certainty and our motto, if we are not the customer's first experience in successful supply and application, we will certainly not be anything but the last experience of this customer successfully.

03

In some cases, we consider the customer a unique competitor because of his usual question "Is your local system?"

07

The customer does not realize the reality of his requests and his requirements for systems until after the actual operation and on real data. The customer's policy of documenting and certifying these requests by the supplied and developed or operated establishment of these systems in the first weeks of signing the contract is only unfair and marketing policy free of initiative and keen to serve the customer.

04

We do not endeavor and do not take care of the customer's ratifications and signatures on the memorandums of achievement of the stages of the application, our constant endeavor to gain the absolute trust of the client and his sense of security towards us his authentication and
